Interactive: Patent Power 2017

The technology world's most valuable patent portfolios

Below is this year's interactive table combining 18 industry scorecards with the top 20 companies in each sector. To see an individual scorecard, select that industry from the list on the right, or select multiple sectors as you prefer. In the zoomable map below, companies are plotted by the country in which their headquarters is located. Companies are plotted by the country in which each headquarters are located in the zoomable map below.

For an explanation of how the metrics are used to derive the Pipeline Power score—which takes into account the value rather than the raw quantity of patents in a portfolio—read the sidebar, "Constructing the Patent Power Scorecard."
